Tank RFQ Checklist

The data needed for a useful quotation

A quotation is only as good as the data behind it. Use this checklist to separate what is known from what must be confirmed before price, material and documentation can be fixed.

Project

Item	Your input
Project name / location / country	
Application (fire, potable, wastewater, process, irrigation, HVAC)	
Required volume; nominal or usable	
Flow rates; fire duration if applicable	
Destination port and required delivery date	

Water and site

Item	Your input
Water/effluent analysis: pH, chloride, TDS, temperature	
Disinfectant / cleaning chemicals	
Site: ground slab, roof, plant room, remote site	
Wind, snow, seismic and roof load data	
Access: road, crane, door/lift dimensions	

Technical and commercial

Item	Your input
Tank type preference, if any	
Connection schedule / P&ID reference	
Named standard, certificate, listing or AHJ	
Inspection / witness / documentation scope	
Installation supervision required?	

What happens next

- We review the data and list any missing inputs before quoting.
- A design basis and drawing scope are confirmed before fabrication.
- Certification claims are checked against valid documents for the proposed product and factory.
- Lead time is stated from approved drawing, not from enquiry.
